

DVR-480XX INTEGRATED DIGITAL VIDEO RECORDER

- Hi Resolution Recording
- Live MPEG4 and sound
- Axiom Integrated
- Robust Industrial Design
- Intelligent search
- Remote notification
- Dynamic IP support
- Web server
- Network & Local Backup
- Enterprise level protection
- PDA and Web clients
- Hot swappable drives
- 3 Year warranty*

Integrated Digital Video Recorder

AxiomView™ DVR is a digital video recorder that serves as a staple for today's demanding security environment. The DVR can capture and store information onto massive hard drives for instant picture retrieval. Not only does it find the video information instantly, but it can be viewed from any other computer on a network or over the Internet.

· Security Management System Integration...

Over the Internet or office LAN, AxiomV™ and AxiomLite™ system users have direct system-wide access to live video, event viewing, history event based video search and video export functionality. Custom tailored assignments link individual Access and Monitoring Points to specific cameras across multiple DVRs, providing an ability to set pre- and post-alarm viewing preferences and PTZ shots

· Single PC Access Control and DVR solution...

New file structures have allowed for the ability to place both AxiomLite™ Access Control System and the DVR card into a single machine.

· Intelli-Search...

This feature allows users to search through recorded images at a rapid pace. Simply select the time associated with the search (from and to), isolate an area by drawing a box over that region and click search. AxiomView™ will search through the database and isolate all images that pass through the chosen area and put them on-screen. You can find any event within minutes.

· Point of Sale (POS) Integration...

AxiomView™ links together with a number of popular Point of Sale devices. Please contact us for more information.

· Pre and Post Alarm Recording...

The AxiomView™ software allows 4 frames to 200 frames of additional recording even after movement stops. This prevents ghosting as the DVR records during paused action.

· Intuitive Sensors...

This is a feature that combines AxiomView™ software with hard wired sensors to create an intuitive sensor. AxiomView™ software has PTZ preset positioning. The preset camera positions can be linked in the software to active sensors. Therefore, when a sensor is tripped or goes into alarm condition the PTZ camera will automatically move to the prescribed preset position.

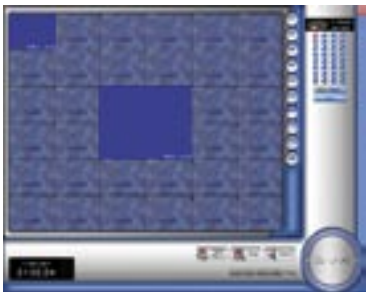

· Protect your CCTV investment...

AxiomView™ DVRs can be easily integrated into existing analog based systems, ultimately protecting previous CCTV investments such as cabling and cameras.

DVR-480xx

08/16/32

INTEGRATED DIGITAL VIDEO RECORDER

Camera Inputs :	8, 16, 32
Frames per Second :	480 fps
Compression Method :	SW/Hardware MPEG 4 Compression
Recording Structure:	Specified image database and AVI with sound
Recording Method:	Normal, Motion, Watch, Alarm, Normal and Event
Motion Detection:	Full or partial motion detection. Customized modes can be selected for each camera
Resolution :	Full Screen - 800 x 600, 640 x 480, 640 x 240, 320 x 240 and 160 x 120 pixels
Screen Format :	1, 4, 6, 9, 10, or 16 divisions and alarm pop ups
DVR Monitor Ouputs :	Main monitor - PC SVGA Monitor NTSC CCTV monitor - switching output BNC and multiplexed output available
Sound Input :	1, 2, 4 & 16 channels of audio
Sensor Input :	4, 8, 16 inputs
Relay Output :	4 relay outputs activated by: sensor inputs, video mo- tion detection and video loss conditions.
PTZ Control:	RS-232-422/485 Interface, all major manufacture's PTZ Protocols are included
Recording Mode :	Normal, Motion, Sensor or combination scheduled recording
Security Functions :	Self-oriented database structure (access impossible) Thumb Print protection (deciphering impossible) Password protection with 3 different levels of password authority Windows block Covert camera function
Searching Methods :	Integrated search in AxiomV and AxiomLite systems Smart object, Time search, Text search Panorama search - provides immediate image
Multitasking :	Pentaplex - Record, monitor, playback, transmit, web broadcast and backup
Watchdog:	Hardware watchdog - auto reboot (Timed control)
Storage :	240 Gigabyte standard, custom options available
Back-up :	52X CDR-W Drive (DVD optional) Network
